Factoring Application Practice

1. The area of a triangle is 18 square units. The height of the triangle is 14 less than twice the base. What are the height and base of the triangle?
2. The area of a rectangle is 18 square units. The length of the rectangle is 9 more than twice the width. What are the dimensions of the rectangle?
3. As a satellite falls from outer space onto Mars, its distance in miles from the planet is given by the formula $d = -9t^2 + 776$, where t is the number of hours it has fallen. Find when the satellite will be 200 miles away from Mars.
