

Polynomial Division: Box Method

Name: _____

Date: _____

Period: _____

The Big Idea: Division is multiplication _____!

Example 1: $(x^3 + 5x^2 + 8x + 4) \div (x + 1)$

$\times$			
x			
$+1$			

Quotient: _____

Remainder: _____

Example 2: $(2x^4 + 3x^2 - 10) \div (x + 2)$

**Missing terms!*

Rewrite with placeholders: _____

$\times$				
x				
$+2$				

Quotient: _____

Remainder: _____

You Try: $(3x^3 + 10x^2 + x - 6) \div (x + 2)$

×			
x			
$+2$			

Quotient: _____

Remainder: _____
